Birthday Party For J. B. Kearns

Gladstone, Va., Aug. 2.- James B. Kearns, of "Wildway," Appomattox County, was honored on his birthday Sunday, August 1, with a buffet dinner served on the lawn by Mrs. Kearns to the members of their family and their friends in the community. The honored guest received many useful gifts. A native of Akron, Ohio, Mr. Kearns has lived in Virginia since his retirement in 1944.

Those present for the occasion were Mr. and Mrs. Lewis Childers and daughter, Janet; and Mr. and Mrs. John E. Childers, of Roanoke; Mr. and Mrs. Raymond Lanier and three children, of Richmond; Mr. Charles H. Wallace and daughter, Wanda, and Mr. and Mrs. Tommy Wallace, all of Farmville. Mrs. B. M. Wallace, Mr. and Mrs. W. E. Akers and daughter, Joan; Mr. and Mrs. Julian B. Hesson and Grey Hesson, Mrs. Carrington Bolton Mrs. Sherman Hunter and Brenda Hunter, all of Gladstone.

Mr. and Mrs. Edwin Wallace and three sons, of Appomattox; Mr. and Mrs. Grover Childers and daughter, Mr. and Mrs. W. T. Childers, Mr. Sam Collins, Mr. and Mrs. Wilson Scruggs and three children. Mrs. Ossie Ferguson, Mr. and Mrs. J. S. Kinney, Mr. and Mrs. Doc Harris and son, Mr. and Mrs. Lawrence Hatcher and grandson, Mr. Leighton Hatcher, Mr. and Mrs. Joe Megginson and two children, Miss Edna Megginson, Mrs. J. Kirk Megginson, Mrs. Percy Garrett, Mr. and Mrs. Bernard Childers and family, Mr. and Mrs. John Scruggs, Mr. and Mrs. Charles Scruggs, Mr. and Mrs. W. C. Ould and Mr. and Mrs. John Gunter, all of Appomattox County; Mr. and Mrs. Earl Wynkoop and four children, who have recently returned from Japan and are now in the county.

Smith Family Reunion

The annual reunion of the family of the late Mr. and Mrs. M. C. Smith was held Sunday at "Mammoth Oak Farm," the home of Mrs. S. G. Smith and Mr. and Mrs. Ben Wheeler and daughter, Louise. A bountiful dinner was served from the dining room in picnic style, and the occasion was enjoyed by all notwithstanding the intense heat.

Those present, in addition to the host and hostesses, were: Mr. and Mrs. R. W. Jamerson, and Walton and Nancy Jamerson, of Bedford; Mr. and Mrs. Ernest Smith, Edwin Smith, and Mr. and Mrs. Leon Waters and two children, of Luray; Miss Garth, of Ruckersville; Mr. and Mrs. Wilmer I. Smith, of Durham, N. C.; Mr. and Mrs. Ed Smith and daughter, Karan, of Maryland; Mr. and Mrs. C. W. Smith, Mr. and Mrs. Leroy Smith, Mr. and Mrs. C. J. Hunter and son, Howlette, Mrs. J. R. Redding and son, Johnny, all of Appomattox.

WILT IS THREAT TO OAK TREES

Oak wilt is an increasingly important threat which, if not controlled could be worse than the disease that turned America's chestnut forests into ghost areas.

That's the warning from F. W. Patton, associate forester, VPI Agricultural Extension Service. Oak wilt was first recognized as a specific disease in 1944. Since then, diseased trees have been found as far east as central Pennsylvania and as far west as eastern Kansas and Nebraska.

Oak wilt was first reported in Virginia in 1951 when a single diseased tree was found in Augusta County. In 1953, the disease was found in Wise, Bath Highland, and Warren Counties. Most of the diseased trees found in Virginia have been destroyed.

Affected leaves become bronze, then brown. Bronzing begins at the tips of the leaves and moves toward the base. It also begins at the top of the tree then at the ends of the lateral branches. In advanced stages of the disease, complete loss of leaves is common. The foliage symptoms are most conspicuous from mid-June to mid-September They can be spotted easily in the fall until the normal autumn colors begin to develop.

Suggestions for control are included in a new Extension Service circular, "Oak Wilt in Virginia." County agents can give free copies.

Colored Dots

The Rev. C. A. Marshall is conducting a revival service this week at the Mt. Pero Baptist Church in Powhatan, where the Rev. B. C. Bucker is pastor.

A large crowd attended the all-day service at the Galilee Baptist Church last Sunday. The pastor preached at the morning service and the local church choir rendered special music. The offering was lifted by visiting deacons, Mace Lewis, Thomas Morgan, Emmette Fleshman, and Judge McDaniels. The afternoon service began at 2:30. The Rev. N. R. Jordan, pastor of the First Baptist Church was the guest speaker. A large crowd attended. Rev. Jordan spoke from the subject, "When God gets angry." The guest minister, Dr. P. L. Harvey was delayed on account of a church funeral and will arrive Wednesday evening. The Rev. J. L. Taylor will preach Monday and Tuesday evening.

A very large crowd attended the 80th session of the Hasidiah Baptist Association held with the Peaks Baptist Church, Prospect, last Thursday and Friday. The moderator, Professor H. A. Johns reported one of the finest sessions. A total of $739.50 was raised. All the delegates expressed themselves as to the hospitality of the pastor, the Rev. C. A. Marshall and the members of the church. The next session will be held with the Triumph Baptist Church near Darlington Heights.

Annual revivals will begin at the following churches this Sunday: Mount Shiloh, Spout Spring; Morning Star, Evergreen; Canaan, Vera; St. Joy, Buckingham. Dinner will be served at the church.

Regular service will be held at the First Baptist Church this Sunday morning. All officers and members are urged to be present and on time.

The following out-of-town guests are spending some time here: Mr. and Mrs. Howard Stevens, of Baltimore; Mr. and Mrs. Garfield Wright and children, of Brooklyn, N. Y. Mrs. Fannie Robinson, of New York City; Mrs. Dorothy Patrick, of Washington, D. C.

Mrs. Annie Turner Bass, Lynchburg is spending some time as the guest of Mr. and Mrs. Hobot Watson.

A large crowd attended the annual home coming service at Mount Airy Baptist Church last Sunday. Dinner was served.

REBUILDING RUN-DOWN WOODS ANALYZED

What will it cost when you start to put run-down farm woodlands into profitable condition?

Foresters at VPI report that to get some kind of answer, the Southern Forest Experiment Station took 40 acres of run-down upland forest in north Mississippi and restored them to full stocking. Careful records were kept of outgo and income. The figure they came up with for that particular tract was about $4 per acre.

When the tract was put under management in 1950, there was an estimated volume of 21,720 board feet. Of this 80% was low-grade hardwoods, and 20% shortleaf pine. Between 1950 and 1953, all trees which lacked the making of one fairly good log were sold or killed. This reduced the volume to 51,080 board feet, and brought an income of $563.

To obtain full stocking, all openings were planted—loblolly pine on the ridges and poplar in the bottoms. All planted seedlings (22-250) and all potential crop trees from the original stand were released by cutting low-grade trees and brush. All crop trees were pruned to a height of 17 feet.

The trees that were harvested yielded 30,800 board feet of sawlogs, 315 fence posts, and 61 cords of salable fuel wood. Planting, hardwood control, pruning, and all other labor required less than three mandays per acre. Labor was paid 80c per man-hour.

Cash outlay for seedlings, tree poison and other incedentals averaged 44c per acre. Taxes and fire protection were 17c per acre annually. Total cash outlay came to $727. Substracting the $563 from products sold, left $164 as the net cash outlay, or $4.05 per acre for putting this particular tract into good growing condition.

If a farmer had been doing the job, and had provided the labor, the sale of products would have repaid all his cash outlays and left him $12.80 per acre for his time and trouble. The real profits will come later as the desirable trees grow.

RAIL & DOVE SEASON SET

The United States Fish and Wildlife Service has just informed Executive Director I. T. Quinn of the Commission of Game and Inland Fisheries that the season for rails will be September 11-November 19 and that there will be a split season on doves, September 11-30 and October 16-November 4.

Daily bag for sora will be 25 and possession limit 25. For other rails the daily bag limit will be 15 and the possession limit after the first day, 30. Hunting hours one-half hour before sunset to sunset.

Daily bag limit for doves 8 and possession limit 16. Shooting hours will be 12:00 noon

Subscription rate: $1.5 payable in advance.

Seed Cleaning and Treating

A Southern States Feed For Every Farm Need

Coleman's Feed & Seed Store

6 Reasons –your family should have a **HOME FOOD FREEZER**

1. **Good Eating the Year-round!** It's always "open season" on your favorite foods when you have a food freezer. Strawberries in December, oysters in July, if you like!

2. **Time Saving, Work Saving!** Processing foods for freezing takes much less time than other methods of food preservation. The preparation of most frozen foods for table use takes less time than for the same foods when fresh!

3. **A Food Freezer Can Pay for Itself!** With planned and regular use, you'll save enough on food costs to pay for your freezer in a short time. You'll buy in quantity at favorable times, take advantage of specials in frozen foods ready to store, and foods to freeze and store!

4. **Greater Variety in Family Menus!** Foods from the freezer take the monotony out of family meals. With year-'round food choices always available, variety in menus is simple and delightful!

5. **Less Frequent Marketing and Baking!** Food shopping can be done weekly or at even longer intervals. And because baked foods can be frozen and stored, you can bake in quantity just once or twice a month!

6. **More Leisure Time for the Homemaker!** Wide and continuous use of the home food freezer means more freedom from the kitchen, less time spent for marketing, meal planning and preparation!

CHICK CHATS

Parasites Pose Poultry Problem

Poultry growth and production are often affected by insects or extenal parasites. Birds become uncomfortable and can come down with disease since insects are often carriers of infection.

Pests such as the common housefly acquire nourishment by sucking up liquids. Many insects breed in filth. When a chicken eats a fly, the bird may become infected with worms and other disease conditions.

The mosquito is anpther harmful insect often found around the poultry house. This insect is a blood sucker and often attacks the chicken's head. The mospito may carry fowl pox from one bird to another by this method of feeding on the head.

Lice and Mites

Lice and mites are not proved disease carriers but because of their chewing and blood-sucking attacks are injurious to a chicken's general health. These common poultry parasites cause a great deal of irritation and loss of blood. Although the harm done by lice and mites is difficult to measure, there is a substantial loss to poultrymen each year due to these parasites.

Control of insects is a matter of good sanitation and effective chemical spraying. Clean surroundings are important in keeping down insect population. Manure heaps and other filth should be cleaned up. Water breeding places of mosquitoes should be eliminated.

Chicken lice can be controlled by applying a treatment to the roosts from which fumes rise and kill the lice. A number of louse powders are effective for individual treatment. Birds are held head down and the powder is dusted into the feathers of the abdomen, under the wings and along the neck and back.

Pest Spray

As a flock treatment for mites, fleas, ticks, and bedbugs, the poultry house interior can be sprayed with a pest spray. Louse powder can be used as an individual treatment for fleas.

Spraying with chemicals is the accepted way to kill pests. Sprays containing DDT or chlordane and other chemicals are valuable both for immediate effects and the residual or lasting effects on insects. Rat control is important in preventing flea infestations in the poultry flock.

By combining sanitation and spraying, you can effectively control insects and make your poultry profits better.

Only once has the speaker of the House ever become president, when James K. Polk was elected in 1894.

Cokesbury's, in Dallas, Texas, is the biggest book store in the nation.

Liberty Chapel

Liberty Chapel, August 3.- Mr. and Mrs. Percy Garrette were supper guests Friday of Mr. and Mrs. Jessie Harvey, Jr., of Lynchburg.

Mr. and Mrs. Sam Thornhill and daughter, Laura and Mildred Ann Thornhill attended the Morris and Lawhorn reunion on Sunday, July 25th, at Lovingston.

The Intermediate and Junior B. T. U. calsses of Liberty Chapel were entertained Saturday evening at Holliday Lake with a picnic supper.

Mildred Ann and Alice Faye Thornhill spent last week with their sister, Mrs. Bill Sperry, of Farmville.

Mrs. Lillie Dunaway returned to her home Sunday after spending some time in the home of her sister, Mrs. J. H. Reynolds.

Mr. and Mrs. Percy Garrette and Mr. and Mrs. Paul Thornhill visited Mr. and Mrs. Bill Sperry Tuesday evening.

Mr. and Mrs. Marvin Reynolds, Mr. and Mrs. Charles Scruggs, and Mr. and Mrs. Wilbur Scruggs plan to spend this week at Virginia Beach.

Homemakers Items

Azaleas may be easily propagated by cuttings taken from the plant.

VPI specialists say to make the cuttings of the present season's wood, about four inches long, after the base of the new stem has become partially mature.

The best material in which to root azaleas is a mixture of half pure sand and half peat moss. Put the material in a special frame or shallow box to a depth of about six inches. Place the frame where it can be shaded and watered when necessary.

Strip th leaves from the lower half of the cutting. Dip the basal end in a root-inducing powder, available from seed stores. Then put the cuttings into the sand and peat mixture about half their length and firm around them. They may be set close together in rows. Pay careful attention to shading and watering.

In a few weeks (6 to 8), roots will develop on most of the cuttings and they should be potted or transplanted to a cold frame where they can be protected until ready to set out in a permanent place.

Strip th leaves from the lower half of the cutting. Dip the basal end in a root-inducing powder, available from seed stores. Then put the cuttings into the sand and peat mixture about half their length and firm around them. They may be set close together in rows. Pay careful attention to shading and watering.

In a few weeks (6 to 8), roots will develop on most of the cuttings and they should be potted or transplanted to a cold frame where they can be protected until ready to set out in a permanent place.

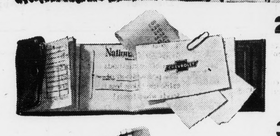
Be sure you **get the best of these big 4**

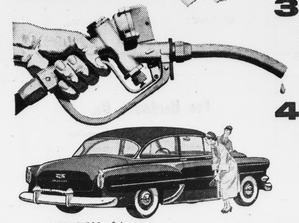
1 performance

Do you want livelier, smoother performance on less gas? Then be sure your new car has modern *high-compression* power. That's just what Chevrolet gives you—the *highest-compression* power of any leading low-priced car.



2 price

Take a look at what you pay and what you get. You'll see that Chevrolet has more *for* you and asks less *from* you. It's priced below all other lines of cars. Chevrolet builds the most cars—and can build them better to sell for less!



3 economy

What's it going to cost to keep that new car in gasoline? In oil? What about service and repairs? Check into it and you'll find that Chevrolet has the greatest name of all for keeping upkeep costs down over all the miles you drive.

4 appearance

You, of course, are the only one who can decide which car looks the best to you. But you might well consider this: Chevrolet's the only one in the low-price field with the smooth lines and graceful beauty of Body by Fisher.

The "Two-Ton" 2-Door Sedan

Other low-priced cars don't offer these advantages. *Chevrolet does!*

Biggest Brakes
Smoother, safer stops with less pedal pressure! That's what Chevrolet gives you with the largest brakes in the low-price field.

Highest-Compression Power
You get finer performance—and important gasoline savings, too—with the highest-compression power of any leading low-priced car!

Fisher Body Quality
You get smarter, smoother styling—greater comfort, safety and quality—with this only low-priced car with world-famous Body by Fisher.

Safety Plate Glass
No other low-priced car gives you the finer visibility of safety plate glass *in windshield and all windows of sedans and coupes!*

Famed Knee-Action Ride
Chevrolet gives you the only Unitized Knee-Action *on any low-priced car—one important reason for Chevrolet's finer big-car ride!*

Full-Length Box-Girder Frame
Only Chevrolet in the low-price field provides the underlying strength and extra protection of a full-length box-girder *frame!*

In '54 as for years before more people are buying CHEVROLETS than any other car.

Now's the time to buy! Get our big deal! Enjoy a new . . . **Chevrolet**

ARTHRITIS?

I have been wonderfully blessed in being restored to active life after being crippled in nearly every joint in my body and with muscular soreness from head to foot. I had Rheumatoid Arthritis and other forms of Rheumatism, hands deformed and my ankles were set. Limited space prohibits telling you more here but if you will write me I will reply at once and tell you how I received this wonderful relief.
